

# SLC Management Canadian Long Duration Overlay Fund

The Fund seeks to gain exposure to long-term government fixed income securities equal to three times the cash value of the Fund by investing primarily in long-term Canadian provincial fixed income securities and entering into repurchase agreements.

## Strategy Highlights

- The Fund invests primarily in high-quality<sup>1</sup> long term provincial bonds
- Can reduce the complexity investors face from implementing a synthetic overlay program, as the derivative strategy is managed within a pooled fund
- Seeks to reduce risk through duration matching and release physical assets for investment in other strategies
- Uses repurchase agreements and derivatives (such as interest rate swaps) extensively to seek to provide an investment with a significantly longer duration than investing directly in Canadian provincial fixed income securities
