

SLC Management Long Credit

Long Credit’s objective is to outperform the Bloomberg U.S. Long Credit Index when measured over 3-to-5 year periods.

Investment strategy and objective

The SLC Management Long Credit portfolio has an overall investment objective to seek total return versus the Bloomberg U.S. Long Credit Index while providing protection against interest rate risk. We attempt to accomplish these investment objectives by investing in U.S. dollar denominated, investment grade fixed income securities. The long term objective of the account is to outperform the Bloomberg U.S. Long Credit

Index when measured over 3-to-5 year periods. The sensitivity to interest rate changes is intended to track the market for domestic, investment grade fixed income securities. The effective duration of the account’s investment portfolio at the end of each calendar month during a fiscal year will typically be within half a year of the benchmark. The primary strategies utilized for value add are sector rotation, issue selection, and yield curve positioning.

Portfolio measures

	Composite	Benchmark
Yield (%)	3.99	4.01
Spread (bp)	150	153
Effective Duration (yrs)	14.23	14.06
Convexity	2.81	2.86
Avg. Credit Quality	A/A-	A-/BBB+

Portfolio composition % by credit quality

	Composite	Benchmark
AAA	7.19	2.79
AA	6.17	10.91
A	35.55	36.41
BBB	51.08	49.89
Below IG	0.00	0.00

SLC Management is the brand name for the institutional asset management business of Sun Life Financial Inc. ("Sun Life") under which Sun Life Capital Management (U.S.) LLC in the United States, and Sun Life Capital Management (Canada) Inc. in Canada operate. The strategy in this presentation is provided by Sun Life Capital Management (U.S.) LLC.

Gross-of-fees returns are calculated gross of management and custodial fees, and gross of taxes on dividends and interest, and net of transaction costs. Net returns are net of model fees and are derived by deducting the highest applicable fee rate in effect for the respective time period from the gross returns each month. Past performance is not indicative of future results.

The Bloomberg U.S. Long Credit Index is composed of domestic investment grade fixed income securities with maturities greater than 10 years. Pursuant to the rules of the Index, the Index's portfolio must (i) have at least one year to final maturity, (ii) have

at least \$250 million par amount outstanding, (iii) be fixed rate, (iv) be U.S. dollar denominated and non-convertible, (v) and be publicly issued. Indexes are unmanaged and are not subject to transaction charges or expenses. An investor may not invest directly in an index.

Yield to Worst: The lowest potential yield that can be received on a bond without the issuer actually defaulting. This metric is used to evaluate the worst-case scenario for yield to help investors manage risks and ensure that specific income requirements will still be met.

Effective Duration: The term "effective duration" is derived from the duration of any security or securities and provides a measure of the risk with which the sensitivity of bonds or bond portfolios and their cash flows to interest rate changes and embedded options can be estimated. A one % increase (or decrease) in the interest rate accordingly produces a percentage fall (or rise) in the price in proportion to the effective duration. For example, assume that the effective duration of a bond portfolio is 4.5 years and the theoretical YTW is 5.3%. If the interest rate drops by 1% to 4.3%, the portfolio price increases by approximately 4.5%.

Information Ratio: Information ratio is calculated using the trailing 5 year period (since inception if less than 5 years of data).

No assurance can be given that the investment objective will be achieved, and an investor may lose money. Due to current

market volatility, current performance may be lower than that of the figures shown. This material is intended for informational purposes only and does not constitute investment advice, a recommendation, or an offer or solicitation to purchase or sell any security or other instrument.
